

# CLOUD NAVIGATOR DATASHEET

## Disaster Recovery for Business Continuity

Take the risk out of natural disasters, failing IT infrastructure, human error, or malicious attack

Rely on the power and reliability of The Microsoft Cloud with ISC's disaster recovery services that provide a cost-effective, automated disaster recovery solution with replication of your applications and data to reduce the risk of downtime posed by unforeseen conditions.

### Protect Your Operations

Keep your business operational during an emergency or disaster—or when mission critical hardware fails.

### Protect Your Finances

Avoid the need to invest in secondary sites or infrastructure maintenance, and reduce the cost of downtime.

### Protect Your Growing Data

Take the work and complexity out of managing your growing volumes of data by replicating to Azure with our automated solution.

### Protect Your Customers

We test your disaster recovery procedures, and provide audit and compliance reporting without affecting production workloads.

## Confident in Your Current Disaster Recovery Plans?

You may be paying for a service that is incomplete or just out-of-date. If you are not sure, it's time to revisit your disaster recovery options. Traditional disaster recovery solutions are expensive as they require a complete infrastructural replication of your environment. Azure Site Recovery from ISC brings you the next generation in protection to your business.
